

UPENDRA REDDIVARI

Software Test Engineer | Manual & Automation Testing | Web (Selenium) + REST API & Microservices Testing

Bengaluru, Karnataka, India
reddivariupendra.mits@gmail.com | +91 9390880035

PROFESSIONAL SUMMARY

Software Test Engineer with 3.2 years of experience specializing in Manual Testing, Automation Testing, Web Application Testing, REST API Testing and Microservices Validation. Skilled in Python, Shell scripting and Java, with hands-on experience in Karate, Bohem, TestNG and Selenium WebDriver automation frameworks for regression and build validation. Strong working knowledge of Atlassian Jira and Zephyr for test management, bug tracking and QA metrics. Proven ability to manage the complete test lifecycle - from requirement and design-document review, detailed test plan and test case creation, test estimation and prioritization, execution of Sanity, Smoke and Regression cycles within the sprint, defect tracking and release sign-off - following Agile Scrum methodology, with active participation in grooming, planning, retrospectives and stakeholder communication.

TECHNICAL SKILLS

Operating Systems	Linux (Primary), Windows
Programming	Python, Shell Scripting, Bash, Java
Testing Types	Web UI Testing, API Testing, REST API Testing, Functional, Regression, Smoke, Sanity, Integration, E2E, System, Microservices, Performance Testing (Basic), JSON Validation, API Response Validation, BDD, TDD, UAT, Exploratory Testing
API Testing Tools	Postman, REST Assured, Karate, API Automation, JSON Schema / Payload Validation
Web UI Automation Frameworks	Selenium WebDriver, Python, Java, TestNG
CI/CD & DevOps	Karate, Bohem, TestNG, Selenium WebDriver, Backend Automation Framework
Database Testing	CI/CD Pipeline Integration (Jenkins / GitLab CI), Build Validation, Automated Test Execution in Pipelines
Performance & Monitoring	SQL (queries, joins, aggregates - HackerRank certified), Cassandra, OpenSearch, Elasticsearch
Test Management	Apache JMeter (Basic), Prometheus
Debugging & Analysis Tools	Atlassian Jira, Zephyr, Confluence, Defect Density & Open Defect Tracking, Release Notes
Methodologies	Log Analysis, Root Cause Analysis, Issue Troubleshooting
Soft Skills	Git, Jira, Zephyr, Confluence, JMeter, Selenium, Postman, WinSCP, Linux CLI
	Agile Scrum, SDLC, STLC, Test Estimation & Planning, Cross-Functional Collaboration, Client / Stakeholder Communication, Build Validation, Release Testing
	Quick Learner, Willing to Learn New Technologies Rapidly, Analytical Thinking, Problem Solving

PROFESSIONAL EXPERIENCE

Software Test Engineer - 3.2 Years Total | Nov 2022 - Jan 2026

Synchronoss Technologies India Pvt Ltd (1.8 Yrs) -> acquired by Lumine Group -> Lumine Software Solutions India

Requirements Review & Test Planning

- Reviewed requirements, specifications and technical design documents and provided timely, meaningful feedback during grooming and refinement.
- Created detailed, comprehensive and well-structured test plans and test cases in Zephyr, mapped to user stories in Jira.
- Estimated, prioritized, planned and coordinated sprint-level testing activities, including Sanity, Smoke and Regression scope, within the sprint timeline.

Testing (Manual, Web UI, API & Microservices)

- Designed and maintained test cases and scenarios based on functional requirements.
- Executed Functional, Sanity, Smoke, Regression, Integration, System, E2E and UI test cycles with systematic result documentation.
- Performed Web UI testing on EmailMX web modules (mailbox access, message views), validating user-facing flows end-to-end.
- Performed REST API Testing including JSON payload verification using Postman and REST Assured to ensure correctness and data integrity of backend service outputs.
- Validated microservices workflows by verifying individual service responses and end-to-end data flow across components.
- Conducted database validation on Cassandra and OpenSearch - queried and verified data storage, retrieval and search accuracy. Comfortable writing SQL queries (joins, aggregates, sub-queries) for relational data validation.
- Performed exploratory testing to identify edge cases and uncover hidden defects beyond scripted coverage.

Automation & Performance Testing

- Designed, developed and executed automation scripts using open-source tools - Karate, Bohem, TestNG, Selenium WebDriver, Python and Shell scripting - for regression and build validation.
- Upheld and enhanced automation frameworks to support sprint-level and release-level regression test execution.
- Integrated automated test execution into CI/CD pipelines (Jenkins / GitLab CI) for continuous build validation.
- Raised pull requests (PRs) for automation script changes, reviewed code and merged to the main branch following team standards.
- Performed basic performance testing using JMeter to evaluate system behavior under load.

Defect Management, QA Metrics & Release

- Identified, recorded, documented and tracked defects thoroughly in Jira / Zephyr with clear reproduction steps, logs and severity classification.
- Tracked QA metrics - defect density, open defect counts and regression pass-rate trends - across releases.
- Managed end-to-end build validation - from build installation and test execution through defect tracking and release sign-off.
- Analyzed application and system logs in Linux environments for root cause identification and developer triage support.
- Updated test plans, test execution status and release notes in Jira, Zephyr and Confluence.

Collaboration & Agile Scrum

- Collaborated with cross-functional development teams and client / stakeholders for defect triage, reproduction and fix verification.
- Independently communicated with development and stakeholders during grooming, sprint planning, daily stand-ups, retrospectives and status meetings, sharing test status, blockers and risks.

KEY PROJECT - EMAILMX (OPENWAVE MESSAGING)

EmailMX is a large-scale enterprise email and messaging platform built using a distributed microservices architecture. It supports key functionalities such as mail delivery, mailbox access, message storage and queue processing through multiple interconnected services. The platform is designed to handle high volumes of data with a strong focus on availability, scalability and reliability, ensuring seamless communication and efficient processing across systems.

Key Contributions

- Delivered consistent testing support across multiple release cycles, ensuring platform stability and quality.
- Improved regression efficiency through automation scripts and reusable test components, reducing manual effort.
- Ensured high-quality releases by performing thorough Web UI, API and database validation, defect tracking and sign-off across sprints.
- Actively contributed to Agile processes including sprint planning, retrospectives and cross-team collaboration.

EDUCATION

Bachelor of Technology (B.Tech) - Madanapalle Institute of Technology and Science

CERTIFICATIONS

- Python - HackerRank
- SQL - HackerRank
- REST API - HackerRank
- Java - HackerRank
- Problem Solving - HackerRank

PERSONAL DETAILS

Date of Birth	12 February 1999
Nationality	Indian
Languages	English, Telugu
Location	Bengaluru, Karnataka
